

Press release: e-shape to expand the EuroGEO community by onboarding further partners in the project.

e-shape launched the **Call for EO-based products 2020** on June 8th to onboard further partners in the **e-shape** consortium and expand the EuroGEO community.

The Call for EO-based products 2020 addresses Earth Observation-based products contributing to the Sustainable Development Goals, Paris Agreement or Sendai Framework. Eligible entities have the unique opportunity to become a new project partner contributing to one of the 7 **e-shape** showcases targeting specific community of users (agriculture, health, renewable energy, ecosystem, water, disasters, climate). New **e-shape** pilots will benefit from a grant of **up to EUR 50,000** as well as the **e-shape** project support including co-design methodologies, deployment support, users' uptake, capacity building & liaison, sustainability & upscaling, communication, dissemination & Help Desk.

"**e-shape** is a great opportunity to support EuroGEO within GEO and to showcase the strengths and the tremendous contributions of Europe for and with users", highlighted Thierry Ranchin, scientific coordinator of **e-shape**.

Onboarded partners will pass through an open, fair, and competitive process. On the **e-shape** website applicants will find under the [onboarding page](#) the [Guide for Applicants](#) and the [Application form](#). The Call for EO-based products 2020 will close on September 4th 2020 at 17:00 CET.

About e-shape

e-shape (EuroGEO Showcases: Applications Powered by Europe) is a project coordinated by ARMINES, launched on May 2019. **e-shape** develops and promotes European Earth Observation capabilities with and for the users. By leveraging Copernicus, **e-shape** opens new opportunities to develop and expand its use, through existing European capacities, and develop research to business activities.
